

GRZEGORZ WITKOWSKI

FRONTEND DEVELOPER (REACT, TYPESCRIPT)

PROFESSIONAL SUMMARY

Frontend Developer with 5+ years of experience building scalable web applications with React and TypeScript. Experienced in developing modern user interfaces, integrating REST APIs, optimizing application performance, and delivering high-quality, maintainable code in agile environments. Experienced in leveraging AI-assisted development tools as part of my daily workflow to improve productivity, accelerate implementation, and support code analysis and refactoring. Skilled in building Chrome Extensions and working across the full frontend development lifecycle.

WORK EXPERIENCE

Frontend Developer | 2026 - current

Power Technology

- Contributed to accelerating product development by delivering new UI views and features using React and TypeScript.
- Improved application maintainability through systematic code refactoring and reduction of technical debt.
- Introduced React Query to improve server-state management, caching, and API data synchronization.
- Integrated AI-assisted development into the daily workflow to improve productivity across implementation, refactoring, debugging, and code analysis.

Frontend Developer | 2021 - current

Motorro Sp. z o.o

- Development and maintenance of web applications in React and TypeScript based on Legacy Code (reduced by ~40%) - React JS, Typescript, MUI, reduced tech debt and provided new possibilities
- Implementing new features and refactoring existing code
- Frontend-backend integration via REST API with React Query
- Implemented Material UI to create component library and reduce repeated code by ~20%
- Optimizing components for performance and code readability
- Developed Chrome Extension (manifest v2/v3, Cross-browser compatible) with app - extension communication to reduce user manual actions by ~80%

Frontend Developer | 2024 - current

MCA - WARE MIRON BALCERZAK

- Creating, developing, and maintaining web applications from scratch in React and TypeScript
- Implementing new features and refactoring existing code
- Frontend-backend integration via REST API
- Implemented Material UI
- Optimizing components for performance and code readability

Frontend Developer | 2024

Unimarket

- Created, developed, and maintained a web application in React, Typescript and Material UI/MUI
- Created a browser extension for managing notes and employees to simplify processes
- Created a browser extension compatible with a barcode scanner and the Baselinker e-commerce platform (reduced manual work by ~80%)

Frontend and C# Developer | 2022-2024

Łukasz Kusyk Software House

- Development and maintenance of web applications in React and TypeScript
- Co-creation and development of application in C#
- Implementation of functionality in the Unity

SKILLS

- React JS (v19), TypeScript, JavaScript (ES6+), Next JS
- React Query, React Context API, React Router
- Basics of Fastify, Mongoose
- Jest, Vitest, RTL, Playwright
- HTML, CSS, TailwindCSS
- Material UI, MUI, Styled Components
- Git, Github, CI/CD, Github Actions, Cloudflare Pages, Bun, Claude, Copilot, AI in Coding, OpenCode
- Rest API, Render, Mongo Atlas, MongoDB, Zod, React hook form, Turborepo
- Responsive Web Desing, WCAG, DRY, KISS, Cross-browser compatibility, design patterns
- Chrome Extensions (Manifest v2/v3)
- Performance optimization and Clean Code

ACADEMIC HISTORY

Maria Curie-Skłodowska University, Lublin | 2019 - 2022

Information Technology | Bachelor Degree

PROJECTS

Chrome Extension – Employee Management System

- Built with React, TypeScript, Chrome API (Manifest v3)
- Automated internal processes and improved team efficiency

Barcode Scanner Integration Extension

- Integrated browser extension with hardware scanner and e-commerce platform

Portfolio Website

- Built using React, TypeScript, Material UI
- Showcases projects and technical expertise

Single Page Company Website

- Built using React, TypeScript and AI
- Business card page for company

MovieMark

- MovieMark is a personal movie and TV series tracking web app. It lets you browse content from TMDB, mark films and shows as watched, keep a "want to watch" list, and track your episodes season by season.
- Full Stack app to learn technologies.
- Built as a Turborepo monorepo and managed with Bun.
- Backend - Fastify 5 runs on Render, Frontend - React 19 + Vite 8 + Typescript 6 runs on Cloudflare Pages, Database - MongoDB 7 - Mongoose 8 runs on Mongo Atlas

ADDITIONAL INFORMATIONS

- English - C1
- Polish - Native
- German - A1
- Spanish - A1
